

Nazi Bigot Heads Pro-White Group

The acknowledged head of the American Nazi Party on the west coast has been identified as the leader of a new hate group called the Citizens to Keep Glendale White Committee.

Milton Senn, Los Angeles director of the Anti-Defamation League of B'nai B'rith, said his office has documentary evidence that the ANP's Ralph Forbes is behind the Glendale white citizens committee.

The newly formed group recently distributed a badly-printed, one-page circular throughout much of Glendale during the early-morning darkness, according to Senn, whose office received complaints from irate citizens.

The race-baiting sheet describes the Negro struggle for equality as: "... a world-wide --- revolution ..." with Glendale "as its next target."

The circular ends with an appeal for money and volunteer workers to prevent Glendale's degeneration into a "... tax-supported nigger-breeding jungle in 10 years."

Senn also revealed that the box number used for replies was the same number used on a similar circular printed earlier by the Keep America White Committee, also based in Glendale.

"All our evidence pinpoints Forbes as masterminding both groups," Senn said.

"Therefore, any support given these groups," Senn cautioned, "benefits the American Nazi Party and all it stands for."
